

See clearly. Decide confidently.™

A visible difference

SoftView™
Enhanced Chest Imaging

A Riverain Medical Technology

SoftView™ is an innovative image enhancement technology that is designed to increase the clarity of chest X-rays by suppressing bone on the digital image. This enterprise-wide solution uses existing X-ray equipment, providing a soft tissue image for digital chest X-rays.

System Features

- Automatically suppresses bones on a digital chest X-ray
- Immediately provides enhanced soft tissue image
- Enterprise-wide solution providing a soft tissue image for digital chest X-rays

Key Advantages

- Increases confidence in your image interpretation
- Clearer secondary view to improve the visibility of soft tissue
- Secondary soft tissue image is automatically included in patient record for convenient viewing
- Benefits patients in multiple hospital settings:
 - Radiology
 - ICU/CCU
 - ER
- Provides enhanced workflow efficiency
- Advanced visualization with your PACS
