[The Best Mobile Xray Solution](#)

Sure signs of summer are here...baseball is well underway, warm weather is the norm and the kids are out of school. Another sure sign is the glut of installations from a very busy first half.

Do You Need to Speak to Your Alpha Imaging Sales Specialist?

To keep that upward trend in sales, Alpha Imaging is offering some very attractive sales promotions on new and demo inventory equipment. So, don't hesitate to contact your representative and ask about these special offers. A full list of Alpha Imaging's Sales Specialist are contained in this newsletter.

Our Imaging Sales Specialists continue to work very hard taking care of our customers and ensuring that they are provided with the information that they require to make informed decisions on equipment purchases for their hospitals and outpatient health centers. Training our Sales personnel to be informational resources for our customers is a time honored tradition here at Alpha Imaging started by my father Al Perrico many years ago.

Staying on top of all the changes occurring in Imaging Industry is a very difficult task for busy Radiologists, Radiology Managers, and Hospital Administrators. We consider it our duty to share our knowledge and expertise with the administrative decision makers and clinical professionals that we are privileged to work with.

Thank you again for taking the time to read this newsletter. Please see our featured product below....

surroundings. The MobileDaRt Evolution can be moved effortlessly

around the hospital thanks to the advanced safety features, including forward field of view, auto-stop

sensors and excellent motor-drive characteristics.

Throughout the world, demand for top quality X-ray images is increasing. Images that are diagnostically valuable, easy to obtain and safe for all concerned. In addition, efficient work flow management is an essential requirement for radiography departments everywhere.

These needs can now be met by the perfect team: Shimadzu's MobileDaRt Evolution digital imaging system, in combination with Canon's full range of state-of-the-art flat panel detectors.

Benefits

- Top quality digital images
- Images displayed in just a few seconds
- Maximum mobility
- Suitable for bedside use
- Comprehensive image review and storage options
- Patient-friendly in use
- Clear and accurate controls
- A choice of DR detectors for general & specialist applications
- Extremely efficient workflow
- Cost effective configuration

In medical facilities requiring quick action, this digital mobile X-ray system allows verification of images just 3 seconds after they are obtained, eliminating the need to replace cassettes and read CR barcodes. Output of up to 32 kW provides rapid radiography that ensures blur-free images, even with children and patients that are difficult to keep still.

Mobile DaRt Evolution provides excellent operability, allowing users to move the system freely for easy positioning in confined locations. This reliable, state-of-the-art system lends powerful support to medical facilities faced with numerous restrictions and a high proportion of urgent
